

Do something *different* this year...

## Community Gift Cards are Perfect for the Holidays

***Delight your employees,  
clients and partners with a  
gift that shows your  
community spirit!***

*Unique to our Community, our eGift Cards work exclusively at our local shops and restaurants. Recipients can choose among food, retailers, salons and spas, entertainment and more – and every purchase helps our local businesses thrive. **There is always something for everyone!***

### It's easy. Here's how!

- Start at your Community's eGift page and specify amount,
  - Or go to Yiftee.com and click "Send A Gift," at the top, then search for your Community eGift Card and specify amount,
- Send one or a whole batch of gifts via email, or print 1-99 gifts from a file of pdf's to hand-deliver,
- Write a message & schedule for delivery if you want,
- Checkout & pay with your credit card. You can edit individual messages and amounts in the cart before you checkout.
- Need help? Contact [sales@yiftee.com](mailto:sales@yiftee.com)

### You have options!

**Monthly reminders:** Send gifts by email whenever possible so recipients get monthly reminders to spend them. Upload a spreadsheet with your recipients' contact information to your account to send all your gifts at once.

**Recoup unspent funds:** No waste! Set an expiration date for your gifts by contacting [sales@yiftee.com](mailto:sales@yiftee.com). You can re-gift the rebate or request a check.

**Get a discount** on the \$1+5% eDelivery fee to \$0.50+3% if you are spending more than \$1000 and paying Yiftee in advance with a check or ACH. Contact [sales@yiftee.com](mailto:sales@yiftee.com). *This is the best option for large purchases and/or ongoing employee rewards and recognition.*

**Get a free business account** that allows you to deposit funds in advance to send gifts at the discounted rate, set expiration dates to recoup unspent funds, give access and budgets to managers for ongoing programs like spot bonuses, employee rewards or anniversary gifts, and run reports and analytics anytime on card distribution and usage.
